LANTERNFIELD LABS

Project Keystone

CHARTER

Document	**Study charter**
Version	1.0 APPROVED
Owner	Dr. Maya Okafor, Principal Investigator
Approved	Dr. Maya Okafor · September 5, 2026

Purpose

Find out whether a wearable hydration sensor measures hydration as accurately as the laboratory reference method, so Lanternfield Labs can decide whether to take the sensor into a larger trial.

Objectives

1. Enroll 60 healthy adults and collect paired sensor and lab readings.
2. Measure agreement between the sensor and the lab method.
3. Report results internally by January 30, 2027.

In scope

- One study site, adults 18 to 65, up to two visits per participant.
- Ethics board approval, trial registration, data management, analysis, and final report.

Out of scope

- Patients with kidney disease, children, and home use.
- Changes to the sensor hardware or software.

Roles

Role	Person
Principal Investigator (decision owner)	Dr. Maya Okafor
Project Manager	Sofia Marchetti
Regulatory	Grace Lin
Clinical Operations	Daniel Reyes, Priya Natarajan
Laboratory	Marcus Bell
Data and Analytics	Hannah Kowalski, Tom Adeyemi

Success criteria

- At least 54 participants with complete paired data.
- No unresolved serious adverse events.
- Final report delivered on time and within the approved budget.

Illustrative sample document created for demonstrating the Project Keystone tracker. Not a real study.
